Testing Inter & Empty()

Success! The intersection of a non-empty set with the empty set is
just the empty set!
Success! The intersection of a non-empty set with the empty set is
just the empty set!
Success! The intersection of a non-empty set with the empty set is
just the empty set!
Success! The intersection of a non-empty set with the empty set is
```

just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of an empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of an empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of an empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
Success! The intersection of a non-empty set with the empty set is just the empty set!
